

## Genesee Zavaleta – Final Project

### **Portfolio Website**

My final project will be a one-page scroll responsive portfolio site, displaying my past projects, using Bootstrap – HTML, CSS & JQuery/JavaScript. It will include a 'Portfolio', 'Resume' and 'Contact' section. The portfolio section will display images of past projects and when the mouse hovers over the image, information such as Title, Description, Duties and Languages Used will show up. The Resume section will show current/past work experience and my different skills in Languages/Programs. The contact section will just be a simple contact form with basic contact information.
